

About Me

I am **Mohammad Mazaheri**, a graduate of computer engineering. I got a master's degree in artificial intelligence from Tehran University of Research Sciences. I was born in 1996 and live in Tehran. I started programming in 2011. I have cooperated with companies such as:

Safar724, Dr. Saina, 7Soft, Idea Gostar Pouria, Maadfan, Alibabam, MirAlavi, etc

I am a website and application developer with the necessary experience and skills in all stages from design (UI, UX) and development to implementation and web SEO. Specialist in designing, installing, testing and maintaining websites and applications; One of my characteristics is my work ethic and ability to solve complex programming problems. Also, during this period, due to my experience, I was able to help my team in analyzing and providing appropriate solutions. I always try to use the latest technology, methods and architectures so that I can provide the best solutions. I have a good team spirit and a sense of responsibility in doing my projects

In 2021, I decided to start my own business and participate. **Tarhbama** And I also launched the design site and application with us. I pursue my goals with motivation and passion and I am happy to work with creative people in this direction. For cooperation, you can read my resume and call me
